HD2301.0 HYGRO- THERMOMETER HANDHELD - READ ONLY

HD2301.0 is a portable instrument with LCD display. It measures relative humidity and temperature using combined probes. Temperature only is measured by Pt100 or Pt1000 immersion, penetration, air or contact probes. When the humidity/temperature combined probe is connected, the instrument calculates and displays the absolute humidity, the dew point, the partial vapour pressure. The probes are fitted with an automatic detection module, with the factory calibration data already stored inside.

The Max, Min and Avg function calculate the maximum, minimum or average values.

Other functions include: the relative measurement REL, the HOLD function, and the automatic turning off (excludable)

The instruments have IP67 protection degree.
