

Flow limiter KM-...G

- Metal construction
- Installation location as desired
- No need for auxiliary power

Characteristics

The constant flow is created by two crossways stainless steel spring plates which close or open an annular gap located behind them to a greater or lesser degree, according to the flow value.

Options

- Inlet side, female thread / outlet side male thread
- Special values
- Selection

Ordering information

- Specify direction of flow, medium, and controlled value.
- For viscous media specify viscosity, temperature, and medium (e.g. ISO VG 10) (enquire about controlled value).
