

Resistance-Transmitter RT 500

Resistance range from 0...50 Ω to 0...100 kΩ

Features

- 12 Bit AD/DA processor technology with 250 Hz realtime execution
- Teach-in programming for initial and final value
- 2- and 3-wire connection
- Output for 0/4 ... 20 mA, simultaneous 0/2 ... 10 V
- Increase or decrease output characteristic programmable
- Operation mode indicated by 2-color LED
- Supply voltage 85 ... 265 V AC or 10 ... 30 V AC/DC
- 22.5 mm case for DIN rail mounting

General information

RT500 transmitter converts a resistance- or potentiometer signal into industry standard signals. Initial and final value may be in the range of 0...100 kOhm. Easy programming by Teach-in. The measuring range will be selected automatically. The input circuit is designed in 3-wire technology and can provide compensation of the line resistance. The linear output-signal is generated between minimum and maximum input resistance.

Short information

| | |
|----------------|---------------------------------------------------------------------------------------------|
| Programming | input programming and output configuration is selected with DIP switches at the front panel |
| Watch-dog | watches program running and provides auto-reset in case of an error |
| Data memory | protection against power failure |
| Current output | maximum burden 1 kΩ |

Technical data

Power supply

Supply voltage : 85 ... 265V AC or 10 ... 30V AC/DC
 Frequency AC : 47 ... 63 Hz
 Power consumption : < 3VA
 Operating temperature : -10 ... +50 °C (14...140°F)
 Rated voltage : 250V, acc. to EN 60664-1 pollution degree 2 and overvoltage cat. 2
 Test voltage : 3 kV, 50 Hz, 1 min. between input, output / supply voltage
 EMC : EN 61326-1, class A

Input

Resistance range : Rmax: 50 ... 100 k , cond.: ΔR 0.5 Rmax (lower values on request)
 increasing or decreasing output characteristic programmable.

Measuring voltage
 and - current

| Measuring voltage | Measuring current | | | |
|-------------------|-------------------|--------|-------------|------------|
| | 6,25 mA | 2,5 mA | 250 μ A | 25 μ A |
| 1 V | 100 | 250 | 2,5 k | 25 k |
| 2 V | - | 500 | 5 k | 50 k |
| 4 V | - | 1 k | 10 k | 100 k |

Resistance values
 for maximum
 resolution!

Resolution : 600 ... 3000 digit (depends on measurement range)
 Sampling frequency : 250 Hz real-time processing
 Cable resistance : 10 max. Automatic compensation in 3-wire-circuits with symmetric line-resistance

Output

Current output : 0/4 ... 20 mA switch selectable; load 1 k
 Voltage output : 0/2 ... 10 V switch selectable; load 15 mA max., short-circuit-protection
 (simultaneous to current output 5 mA max.)
Attention! No isolation between input and output!

Rise time (t₉₀) : < 8 ms
 Accuracy : < 0.25 %
 Temperature coefficient : < 100 ppm/°C

Case : standard case of polycarbonate 8020 UL94V-1
 Weight : approx. 200 g
 Protection : Case IP30, terminals IP20 finger safe acc. to German BGV A3
 Connection : screw-terminals with pressure plate max 2.5 mm², wire

Programming

| Programming resistance measuring range | |
|----------------------------------------|--------------------------------------------------------------------------|
| 1 | Set resistance (Rmin) at terminals 1,2,3 |
| 2 | S1 ON -> RT500 stores the value of Rmin |
| 3 | -> LED flashes green = OK -> LED flashes red = error (see status LED) |
| 4 | S1 OFF |
| 5 | Set resistance (Rmax) at Terminals 1,2,3 |
| 6 | S2 ON -> RT500 stores the value of Rmax |
| 7 | see point 3 |
| 8 | S2 OFF -> Programming of the measuring range is now completed |
| 9 | Set with S3 the wanted output configuration |

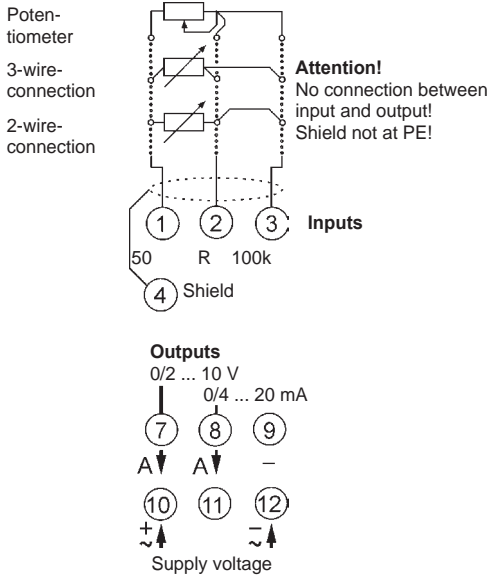

| Status of the front side LED | | |
|------------------------------|--------------------|----------------------------------------------------------------------------------------------------|
| OFF | green | Operation mode |
| | red | Measuring range exceeded or break of line |
| | red/green flashing | Last programming invalid. Resistance value could not be stored |
| ON | LED off (2 sec.) | Resistance value stored |
| | green flashing | Measured resistance value has been stored in the EEPROM |
| | red flashing | The difference of the resistance is smaller than 20 ... 50% (depending on measuring range) of Rmax |
| | red | Measured value exceeds the max. value of 100 k . Resistance value could not be stored. |

Examples:

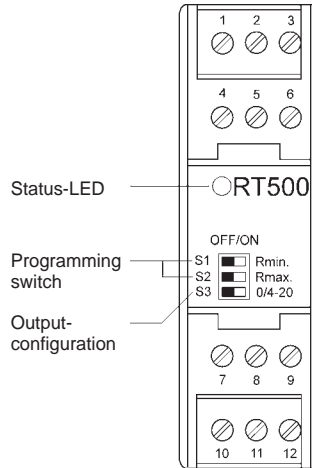

1.) Measuring range 15 ... 90
 2.) Measuring range 0 ... 1 k
 3.) Measuring range 100 ... 200

Attention! Minimal span 0.5 Rmax

Connection diagram

Front panel controls

Dimensions

Caution!
Mounting of multiple units without distance is only permitted in horizontal orientation.

TS35 DIN rail mounting
acc. to DIN 46277 and DIN EN 50022

Ordering code

RT500 - -

1. Measuring range

40 Rmax programmable from 50 up to 100 k
(see examples page 2)

2. Supply voltage

0 85 ... 265 V AC
5 10 ... 30 V AC/DC

Note: Configuration is possible ex factory without extra charge.
Please state the desired data, when ordering.
E.g.: 0 ... 250 or 150 ... 800
